Step 2: Review Account Details

Once you have selected an account to review, you will land on the account details page. At the top left side of the screen, you will see the account that you selected and the balance.

Directly below, you can view the account details, including the account number, branch/transit number, and the institution number.

Tip: Below your account balance at the top of the screen, you will notice an option to rename your account. You can change the name of your accounts in online banking to anything you would like and at any time. Renaming your account is an optional feature to help you keep track of your accounts and what they are used for. (For example: “Real Estate Property” or “Construction Expenses”).

Step 3: Review Transaction Details

Under transaction history, you can review all of the transactions associated with this account. This includes your deposits and withdrawals, and the balance in the account after the transaction was made.
